How to get 60 USD with only invest from \$ 5 in Altcoins 100% LEGAL

Autor: StoreDigitalCore from TradeRoute

Thank you for purchasing this guide, now show you how much I got \$ 60 from a \$ 5 investment.

And the steps are as follows:

First you must have balance in Bitcoin from Cryptopia which is where we will make our exchange for another cryptocurrency and later I'll explain how you can choose the appropriate cryptocurrency in which to invest your money and so after a while withdrawing the balance and pass it to Bitcoin for finally, if you decide to remove it in Paypal and from there to your bank.

Second for this we must choose a cryptocurrency in which the price dropped below a high price, then see the price chart over time (<https://coinmarketcap.com/currencies/bitcoinfast/>), in this case I chose BitcoinFast as it has a resemblance to the mother of all criptomonedas which is the Bitcoin, after seeing the price decided to invest in it because I felt good name.

In the part of Timestamp can see the date of purchase and when removing the BCF.

After two months check the price of my coins (\$ 0.011438 each) and found that the price of 4999.50 was 61 USD for my surprise is not bad when you spend little and get more.

Fourth

After two months I decided to withdraw 2000 BitcoinFast are 20 USD in Bitcoin and then to Paypal (optional: Paypal to the bank in your country).

And finally to convert it to USD <https://coin2pal.info/> use the service to pass to Paypal and you have the option of passing them to the bank if more than 10 USD and do not charge commission, ready receive in your bank two four days depending on your source.

The screenshot shows the Coin2Pal website interface. At the top, there's a header with the Coin2Pal logo and a navigation bar with links like 'Sell Bitcoins', 'How To Use', and 'FAQ'. Below this, there's a section titled 'Do you need to exchange altcoins into bitcoins? Use SouthXChange!'. The main content area is a form for selling Bitcoin to PayPal. It includes a 'Current price' of 2479.524 USD/Bitcoin, a 'I want to...' section with radio buttons for 'Receive funds in my own PayPal account (cost: \$0.20)', 'Send funds to a third-party PayPal account (cost: \$1)', and 'Verify my email address so that I don't have to confirm each order'. There's a field for 'Your PayPal email address or code:', a 'Amount of Bitcoins to sell:' field with a 'Max: 0.3 BTC' limit, and a 'We will pay: 0.00 USD' field. An 'Update' button is present. At the bottom, it shows 'Estimated amount to receive: 0.00 USD (assuming 2.9% standard U.S. PayPal fee)'.

Conclusion: As previously saw my guide if it works at 100% and do not despair if you do not get quick results, you can invest in different cryptocurrency and see how price increases and generate profits for you. You decide if you want to be in the system of government as a slave following his system, I'm just giving you an alternative to generate income by trading altcoins and their respective effective way to do it.

If you like, do not forget give me a feedback for the product.
